

I began my airline career with US Airways in 2006, as an International Awards Reservations Representative. I was an advocate for members as a steward of CWA Local 3640. I filed many grievances resulting in the removal of points and discipline when the contract was violated. I have also been an active part of the CWA National Legislative Political Action Team, lobbying for the rights of workers of the airline and other industries. During this time I was involved in pickets and marches for family rights and teacher pay among other issues affecting communities across the state.

In 2020, I was nominated for Area Representative representing the tariff department and won by acclimation. As a result of the changing environment of reservations and the subsequent closure of my office during the pandemic, I was awarded a transfer to Charlotte and became a member of 3641. As a Customer Service Agent, I have continued to advocate for all members.

I believe that communication is key for any group of people. All areas need representation and all members need to know what is going on, especially during a crucial time such as bargaining.

I really appreciate the nomination. It would be a pleasure to serve the members of CWA Local 3641.
